

KEEN®

Be careful, it's sharp!

Following the 9 year success story of the NEXT® range Keen®, our R&D operation's latest innovation, has arrived for use in areas where cobalt is still considered to be the traditional solution.

You want to offer **the best diamond tools solutions** for your **abrasive and hard materials**? You want to face up to competition and pressure on prices?

Keen® combines a high level of impact strength (resilience), very good hardness and greater mechanical strength with the economic advantages of the pre alloyed solutions.

Keen® high ductility and hardness:

- keen®10, for general materials.
- keen®20, High-tech product designed for high performances and severe materials.
